

THE
SLIDING DOOR
COMPANY®

safer, smarter, stronger solutions for schools.

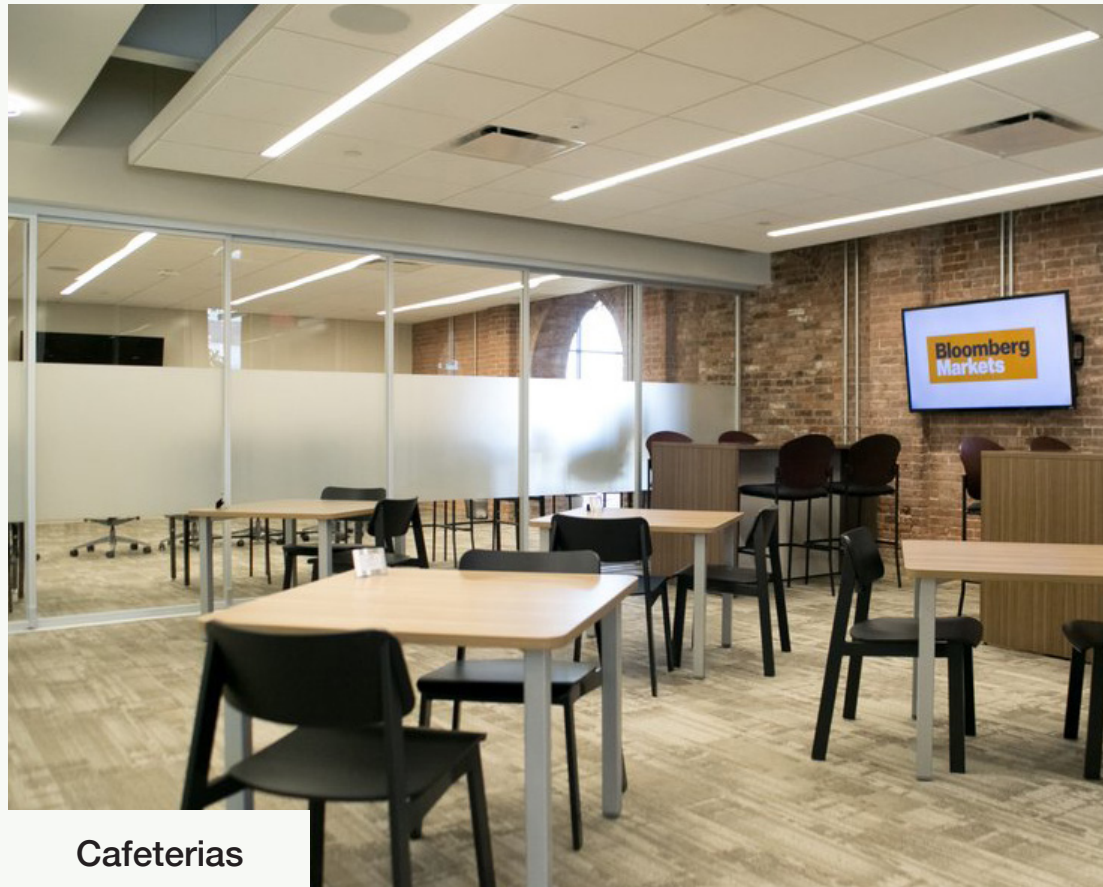

smarter, safer schools

by the **sliding door company**

Education should be a **productive, safe, and enjoyable** experience for students and teachers alike. The Sliding Door Company designs rooms and custom partitions that promote safer environments, dampen airborne disease transmission and empower educators to perform at their best with **confidence and peace of mind**. Our all-glass walls are easy to clean, resistant to damage and offer a range of transparencies— with a **no-construction required, 24-hour installation**.

solutions for:

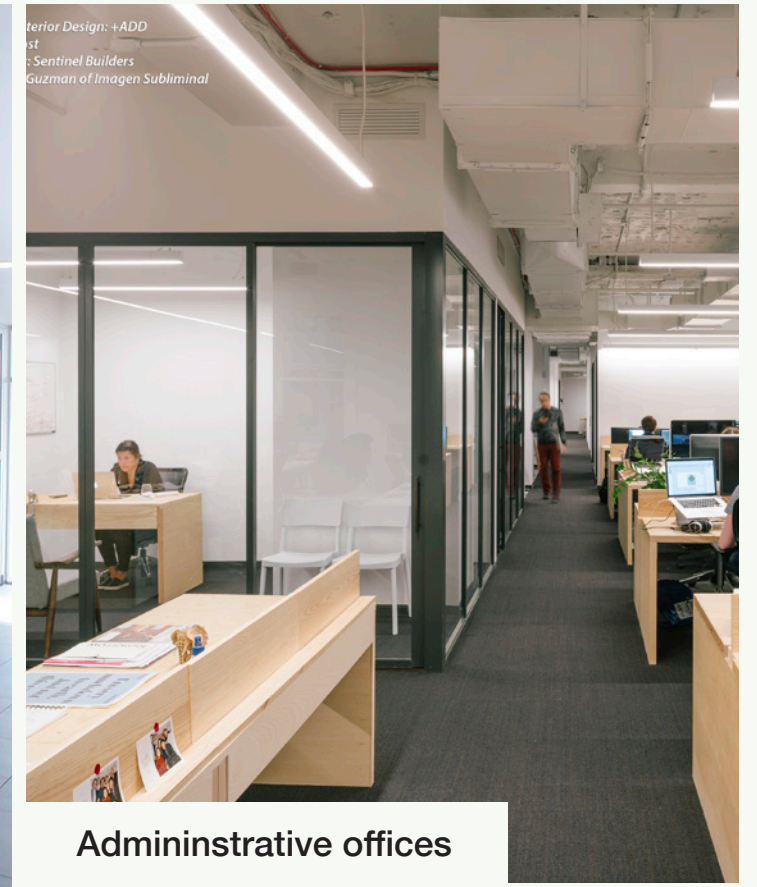

- safer classrooms
- more productive workspaces
- dynamic common areas
- healthier clinics
- better storage organization

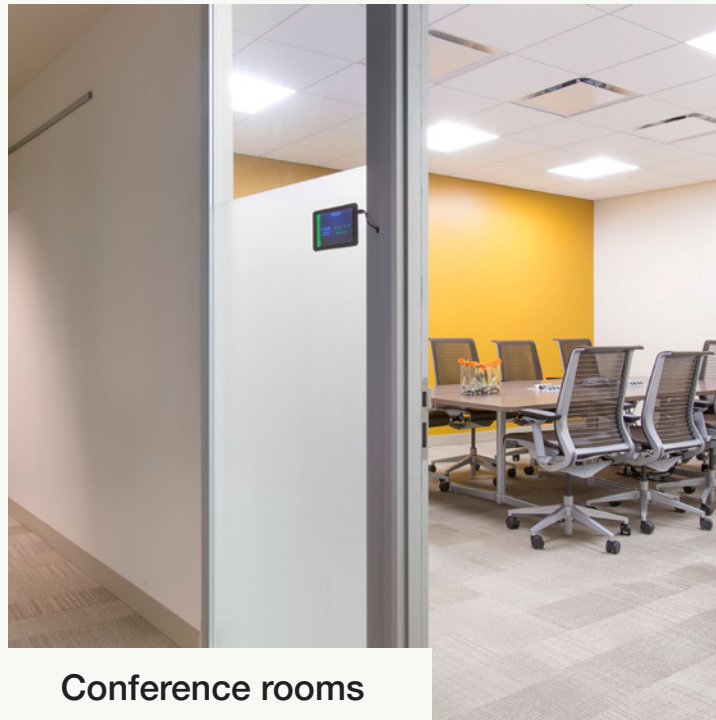

Cafeterias

Lobbies

Administrative offices

Conference rooms

Libraries

Study areas

Community spaces

Safety and peace of mind.

Germ-Free

Acrylic is porous whereas **glass is anti-microbial**. A lot of healthcare providers and hospitals choose glass over anything simply for this reason. It can be sterilized very easily and because of its tempered design, holds up in very demanding spaces.

Easy to Clean

Why? For one, acrylic can only be cleaned with warm water and soap. If any other cleaner is used, you will crack the acrylic and it must be replaced. If this is a laminated decorative piece, the whole thing will have to be reproduced.

The Sliding Door Company designs custom dividers and rooms for teachers, administrators and staff.

Work clearly, safely, confidently.

Wellness Glass Walls are the future of healthcare engineering. Glass is anti-microbial and easy to clean.

Protect your students and healthcare staff.

Wellness Glass Walls is our exclusive line of health-centric glass partition systems designed to protect both patients and healthcare workers from airborne disease transmission and peer-to-peer exposure to illness—from COVID-19 to the common cold.

Featuring dynamic configuration options ranging from full-size examination rooms to single-occupancy “pods”

designed for waiting rooms (see below), Wellness Glass Walls are flexible enough to suit almost any existing space.

Wellness Pods

Single-person waiting rooms with clear glass doors allows healthcare workers to monitor waiting patients.

Stay Connected

New space, same wifi: Our glass walls reduce wifi and cellular signal interference.

Preserve Visibility

Transparent or semi-transparent glass so you can keep an eye on the outside—and let in the natural light.

Quick Install

We install our home offices in around 24 hours without the need for additional construction.

Staying focused

A corridor is given new life as a quiet study room by installing dividing walls with our sliding doors.

Customize with branding

Glass panels can accommodate for custom branding based on your institution's needs.

Ready for anything.

Glass walls are perfectly suited for any space—even gyms and recreation centers.

**Organize
space without
sacrificing
natural light.**

Glass is Naturally UVB Resistant

Over time, acrylic will yellow. With a film or coating, acrylic can be UVB protectant, at a cost. Glass is naturally UVB protectant making it a great product to protect furniture as a glass tabletop, art work in frames, or when used as architectural decorative glass, perfect for protecting entire spaces.

Note that glass is NOT UVA resistant without a film or coating, so you can still get skin damage.

A flexible, patented system with no construction needed.

No need to relocate your HVAC, Sprinklers, lighting or wireless systems.

- Easy to Assemble and Disassemble.
- 100% reusable, 100% transportable .
- The bottom track doesn't require anchoring.

Glass

- Tempered safe glass or safety
- Demi-glass as **white board**

ADA compliance

- 3/8" ramps for the bottom track
- Handles & Locks with ADA approval.

Clear glass walls empower educators to manage large classrooms while safely reducing peer-to-peer contact.

When to Use Glass and not Acrylic

- High traffic areas
- When a clean environment is a must
- Scratch resistant
- Daylighting an environment
- When you need UV protection on the cheap
- When you can't worry about maintenance
- When longevity is necessary

Glass walls divide excess space in this school's library into a new class- or workroom for smaller groups of students.
